PROFILE

I'm a front-end developer with a specialization in software engineering. Like an artist carefully selecting colors and brushstrokes, I am passionate about creating UI/UX designs that are simple, accessible, and visually appealing. I often use pastel or light-specific colors, crafting digital landscapes that captivate and soothe users.

My goal is to make each interface a masterpiece, functional and bug-free, providing a seamless user experience akin to enjoying a perfectly executed piece of art.

WORK EXPERIENCE

Angular Frontend Developer

Uhura Solutions

01.02.2023 - current

As a member of the development team at Uhura Solutions, I played a small role in transforming the financial automation software. Our software harnesses advanced AI and ML technologies to enable banks and corporate clients to efficiently manage large volumes of documentation. My responsibilities included:

- Redesigning the existing application to enhance user interaction and aesthetics.
- Implementing new features in the Angular framework to improve application performance and functionality.
- Optimizing code for better scalability and maintainability.
- Actively participating in planning and defining application architecture.

Through this project, I gained insights into complex technological components (AI, ML) into frontend applications. Working in a dynamic team environment on high-impact projects for users strengthened my abilities in real-time problem-solving and continuous software optimization.

ReactJS Frontend developer

Fuel Me

01.02.2022 - 31.01.2023

As a remote ReactJS Frontend Developer at Fuel Me, a company headquartered in the United States with a programming team consisting of members from Montenegro and Serbia, I contributed to enhancing software solutions tailored for gas stations and related corporations. The software provided insights into the transfer of oil, gas, and similar products within the industry, including tracker overviews. My key responsibilities included:

- Redesigning the application interface to improve user experience and visual appeal.
- Enhancing code quality and performance to ensure scalability and maintainability.
- Implementing new features and functionalities to meet evolving business needs.
- Collaborating effectively with a distributed team across different time zones.

Working on the Fuel Me project allowed me to deepen my expertise in ReactJS development while navigating remote work dynamics and multicultural team collaboration. It provided valuable experience in delivering impactful solutions to streamline operations and enhance user engagement within the energy sector.

COURSES

JavaScript Algorithms and Data Structures

FreeCodeCamp, Nov. 2021.

Responsive Web Design

FreeCodeCamp, Nov. 2021.

Web development; Frontend development (ReactJS)

DevelopersLab, Sep. 2021.

Modern HTML & CSS From The Beginning (Including Sass)

Udemy, Jan. 2021

DIPLOMAS

Spec.Sci Degree

Bachelor Degree

WORK EXPERIENCE

ReactJS Frontend Developer

NinjaCloud

01.04.2022 - 01.09.2022

As a part-time Frontend Developer at NinjaCloud, based in Novi Sad, I collaborated with a team of developers primarily from Montenegro on a greenfield project called CyberLux. This project aimed to automate event reservation processes and interface customization for various client types. Key responsibilities included:

- Leading the frontend development efforts from inception, including application setup, design decisions, and architecture definition.
- Collaborating closely with the team from Montenegro and Serbia to build the application from scratch.
- Designing the application interface to enhance user experience and functionality.
- Adding new features and functionalities based on client requirements and market trends.
- Working closely with the backend team to ensure cohesive application architecture.

Working on CyberLux at NinjaCloud provided invaluable experience in setting up and leading frontend development for a new project, making critical design and architecture decisions, and collaborating effectively with a distributed team. This role not only enhanced my technical skills in ReactJS but also strengthened my ability to deliver innovative solutions in a dynamic and collaborative environment.

Intern Laravel Developer

QQR IQ

01.01.2021 - 31.12.2021

As an intern Laravel Developer at QQR IQ, I had the opportunity to work on various projects, gaining insights into client requirements through direct communication. Leveraging my strong foundation in PHP programming from my academic background, I primarily focused on backend development. Key projects and responsibilities include:

- **UrbanOne:** Led backend development for a project allowing users to upload designs and apply them to products such as mugs and shirts. Acquired skills in coordinate systems, image processing using the ImageMagick library, element positioning, and project database management. Contributed to architectural enhancements as needed.
- **Piano Cars (Rent a Car):** Worked on expanding project architecture and implementing new functionalities. Gained experience in optimizing backend processes to improve performance and scalability.
- **Petzoona Blog:** Revamped backend architecture, incorporating frontend functionalities, enhancing style and responsiveness, and managing user authentication and site localization.

Through these projects, I honed my skills in Laravel backend development, project management, and client interaction, gaining practical experience in adapting to varying project scopes and technical requirements. My contributions played a pivotal role in delivering robust solutions that met client expectations and improved user experience.

HOBBIES

- **Reading:** Enjoy reading engaging and thought-provoking books across various genres.
- **Clay Handcrafts:** Passionate about creating handmade items from clay, exploring creativity through craftsmanship.
- **Learning New Skills:** Dedicate time to continuously expanding knowledge and mastering new skills.
- **Listening to Crime Thrillers:** Find enjoyment and enhanced concentration through listening to crime thriller podcasts or audiobooks, often during work breaks.

HOBBIES

- **Designing Business Cards and Small Creations:** Have a knack for designing business cards and small creative projects, focusing on aesthetics and functionality.
- **Writing about Movies, TV Shows, and Books:** Share insights and perspectives on compelling series, films, or books through writing and discussions.
